

Exhibit #2 – Working Draft - A

Pertains to Exhibit #2... but though the plaintext is in Latin, this iteration's plaintext does not match the Exhibit #2 plaintext as published in Silent Years (which begins GALLIAESTOMNISD), nor does the ciphertext match that in Silent Years (which begins TLXFWYHBICOJSP). However, at the top of this page Byrne has written: "Initial position immediately below". No Keyword is provided.

Interestingly, Byrne has written plaintext SIVALESBENEESTW directly over first ten ciphertext rows which are represented by alternating R/L cipher wheels. For rows 11 thru 24, he has not done so. Note also that he has included 6 enciphered characters over the last 6 Plaintext characters between rows 23 and 24.

First screenshot below is close-up of 1st page instructions; the following pages display All Rows 1 – 24 (row 24 is not numbered).
