

## Exhibit #2 – Working Draft – B

As Byrne writes “Si Vales Bene est W” at the top of each page, this is clearly another working draft for Exhibit #2. There are noted differences, however, between this Working Draft - B and that of Working Draft – A:

- Byrne has not provided any Plaintext above the alternating L/R wheel text sequences
- Above Row 1, while Byrne has again provided his starting L/R wheel sequences, he has also encircled several letters (Q, H, & P on alternate wheels) and drawn multiple lines that suggest ‘pathways’ through the L/R wheels for consideration in the encipherment scheme.

The interpretation of the encircled letters and lines are not clear at this time, either in relation to this specific Draft or Exhibit #2 as published in Silent Years. However, see the Document ‘Exhibit\_2\_Encipherment\_Grid’ where these markings appear to align with ‘circular and cascade movements’ noted by Byrne in his final encipherment schema.

Scroll/Shift to next Page for screenshots of Working Draft – B.
